

FirstRe

Core Reinsurance Systems Suite

Reinsurers today face significant challenges of rapid business environment changes with the rise of natural and man-made disasters worldwide, and increased focus on compliance and financial controls. Lack of real-time global view of exposures in various businesses across nations represents a key issue for global players.

FirstRe addresses global and country-specific operational, processing and reporting needs. FirstRe is fully integrated software solution developed specifically for the Professional Reinsurance market, facilitates processing of both assumed and ceded reinsurance businesses. Operational and business process support for both Treaties (Proportional and Non-Proportional) and Facultative Contracts (Property, Marine, Casualty, Life, Accident, Disability, etc.) is catered for, as well as handling Direct and Retrocession businesses, providing cohesiveness between Reinsurance Underwriting, Claims, Retrocession, Risk Accumulation & Control and Accounting.

FirstRe enables Insurers with

- Comprehensive Recoveries Control and Collection - automated and accurate calculation of ceded losses.
- Enhanced Reinsurance Program Management and Design - provides management with current financial, analytical and operational information to monitor program effectiveness and enhance the underwriting process and decision making.
- Fast and efficient implementation of new treaties and revisions - meeting industry standard data requirements for all treaty types and accounting methods with out-of-the-box user-defined rule and rate tables.
- Single system to support Assumed, Ceded and Retroceded Reinsurance.
- Tracking of all financials to Policy, Claim and detail attachment level.
